

ANCHORAGE RATCHET BOOM STRAP

Anchor point can also be used as a tie off point when you are inspecting the boom, cleaning or clearing snow off the top of the trucks.

The inside of the strap is lined with gum rubber to eliminate slippage on the boom.

A ratchet is used to cinch the strap snugly on the boom.

**Anchorage Ratchet
Boom Strap
3809R**

The Ratchet Boom Strap is designed to be used when your aerial boom truck has no anchor point, or your anchor point is in an inconvenient location.
