

CONFINED SPACE RESCUE KITS

These unique systems allow for a rescue to be accomplished without having to send additional personnel into the hazardous area. Entrant suited with a full body harness (model **603S8Q211**) enters the confined space with or without being tethered.

For non tethered rescue, the attendant/rescuer uses the rescue line system (**39SAM13Q9-30**). The rescue line equipped with a carabiner is attached to a 16' telescopic pole via the telescopic pole adapter (model **40**). The adapter releases the carabiner once the rescuer locates one of four reflective rescue loops, "hooks" into a loop and pulls back on the pole. The rescue line is then tied on to the winch and the rescuer then proceeds to raise the victim.

For a tethered rescue, the attendant/rescuer uses the rescue line system (**39SAM13Q3-30**). Entrant enters the confined space with a lifeline (**39SAM13Q1**) attached. The lifeline is attached to the manhole guard/rescue winch with a specially designed breakaway assembly. This device will release upon impact such as that of a vehicle which has entered the work zone and strikes the manhole guard. For rescue, the attendant/rescuer attaches the ascender to the winch line and proceeds to raise the victim.

Systems ideal for use with the BuckTrier™ Harnesses

**Non-Tethered Confined
Space Rescue Kit**
105Q2-30

INCLUDES:

- One manhole guard.
- One winch.
- One 16' telescopic fiberglass pole.
- One **39SAM13Q9-30** Rescue Line Kit (Two 30' lifelines, model **40** telescopic pole adapter & rope bag).

**Tethered Confined
Space Rescue Kit**
105Q1-30

INCLUDES:

- One manhole guard.
- One winch.
- One **39SAM13Q3-30** Rescue Line Kit (One 30' lifeline with ascender, breakaway assembly & rope bag).
